To whom it may concern

Explanation of the digits in the batch number of the finished product

Example:

130937300

The first two digits of the code **(13)** indicate the year of production minus 10 ($23-10=13$).

The next two digits of the code **(09)** indicate the month of the year by number, when the product was produced.

The fifth and the sixth digits of the code **(37)** indicate the calendar week in year, when the product was produced (week 37).

The seventh digit of the code **(3)** indicates the ordinal number of the day of a week, when the product was produced (Wednesday).

The last two digits of the code **(00)** indicate the serial number of production of the same product in one day.

With Best regards,

Olga Shatova
